Mr William G. Rockefeller,
26 Broadway, New York.

Dear Sir:

Your kind favor of Feb. 24th, granting permission to the Forest, Fish and Game Commission to run lines and establish an observation station on the top of St Regis Mountain, received. Commissioner Whipple directs me to thank you for your kindness. He will certainly be very glad to co-operate with your Mr. Redwood at Bay Pond by apprising him of any fires discovered, through the use of our system or by our men. He also wishes to thank you for your suggestions regarding the direction which the telephone line should take and the connection that might be made at Paul Smiths.

The acknowledgment of receipt of your communication has been delayed somewhat owing to the absence of Commissioner Whipple and several conferences he has been holding with his Fire Superintendents regarding this matter.

Very truly yours,

Sec'y to Commissioner.
